CERTIFICATION AND LICENSURE

Federal Licensing Examination (FLEX), June 1985

Texas Medical Jurisprudence Examination, June 1985

Texas State Board of Medical Examiners, August 1986

Board of Medical Examiners, State of North Carolina, May 1987

California Board of Medical Quality Assurance, November 1989

Fellow of the American Board of Dermatology, November 1989

Fellow of the American Board of Mohs Micrographic Surgery and
Cutaneous Oncology, June 1991

Fellow of the American Society of Dermatologic Surgery, 1990

Fellow of the American Soc. for Laser, Medicine and Surgery, 1998

Member of the American Society for Laser Medicine and Surgery, 2005

PROFESSIONAL EXPERIENCE

1998 – present Private Practice, Cary Skin Center, Cary, NC

1997 – 1998 Associate Professor of Medicine
Assistant Professor of Surgery
Director, Dermatologic Surgery & Cutaneous Oncology Unit and
Cosmetic Laser Center
Duke University Medical Center, Durham, NC

1995 - present Medical Advisor to Coherent Laser Corporation, Palo Alto, CA

1993 - present Medical Advisor to Tri-Point Medical
L.P./Closure Medical Corporation, RTP, NC

1990 - 1997 Assistant Professor of Medicine (Dermatology)
Director, Dermatologic Surgery and Cutaneous Oncology Unit
Duke University Medical Center, Durham, NC

1989 - 1990 Associate in Medicine (Dermatology)
Duke University Medical Center, Durham, NC

1982 - 1984 Chilton Post-doctoral Fellow, Department of Biochemistry
University of Texas Southwestern Medical School, Dallas, TX

1978 - 1980 NIH Pre-doctoral Fellow, Department of Biochemistry
University of IL, Urbana, IL

HONORS AND SOCIETIES

Undergraduate (Austin College): Honors Graduate; Beta Beta Beta, National Biological Honor Society, Treasurer 1974-1975; Beta Beta Beta, National Biological Honor Society, President 1975-1976.

Graduate (University of Illinois): Phi Lambda Upsilon, National Chemistry Honor Society for Graduate Chemistry.

American Medical Association: member - 1981 to 2010

Texas Medical Association: member - 1981 to present

North Carolina Medical Society: member - 1988 to present

American Academy of Dermatology: member - 1989 to present

American Society for Dermatologic Surgery: member - 1990 to present

American College of Mohs Micrographic Surgery and Cutaneous Oncology: member - 1990 to present

COMMITTEE APPOINTMENTS

North Carolina Dermatology Association:
President 2012

North Carolina Dermatology Association:
President-Elect 2011

North Carolina Dermatology Association:
Secretary Treasurer 2010

DUMC Committees:

Clinical Practice Group Committee

PDC Keogh Retirement Committee

Co-Chairman, Billing and Collections Subcommittee of the PDC

Board Member, Center for Aesthetic Services

Task Force on PA/NP's Use in Specialty Clinics

American Academy of Dermatology:
Xeroderma Pigmentosum Task Force 1992 - 1998

American College of Mohs Micrographic Surgery and Cutaneous Oncology:
Chairman, Membership Committee 1995-1997
Member, Council/Committee/Task Force: Task Force on
Proficiency Testing 1996-1998
Mohs College Fellowship Training Program Site Surveyor

American Society for Dermatologic Surgery:
Ad Hoc Survey Task Force

American Society for Laser Medicine and Surgery:
Government Liaison 2000-2003

American Society for Laser Medicine and Surgery:
Chairperson of Government Liaison/Blue Ribbon Committee
Term expires 2003

North Carolina Medical Society:
Member of the Legislative Cabinet for the Society year October 2014 – October 2015
Member of the Surgical Facilities Task Force
Member of the Clinical Quality and Health Care Financing Committee for the
Society year October 2009 - October 2010
Member of the Quality of Care and Performance Improvement Committee for the
Society year October 2008 - October 2009
Member of the Quality of Care and Performance Improvement Committee for the
Society year October 2007 - October 2008
Member of the Quality of Care and Performance Improvement Committee for the
Society year October 2005 - October 2006
Member of the Definition of Surgery Task Force
2006 Leadership College Scholar

RESIDENCY RESEARCH

November 1986 to December 1987: Clinical studies involving the treatment of keloids and hypertrophic scars with intralesional bacterial collagenase and corticosteroids.

March 1987 to June 1989: Clinical studies on the ability of a topical preparation of a known lysyl hydroxylase inhibitor to prevent the recurrence of keloids following shave excision.

January 1988 to May 1988: Restriction fragment length polymorphism patterns in the DNA isolated from two American black patients with clinical and histopathological evidence of dermatitis herpetiformis. Results presented at the Society of Investigative Dermatology meeting in April 1988 and submitted for publication in the Journal of the American Academy of Dermatology in March 1989.

May 1989 to June 1990: Use of the flash lamp-pulsed tunable dye laser for the treatment of hypertrophic scars and keloids.

POST-DOCTORAL RESEARCH

1982 to 1984: Chilton Post-doctoral fellow in the lab of Nancy Martin, Ph.D., Assoc. Prof. of Biochem., Div. of Molecular Biology, UT Health Sci. Ctr. (Dallas, TX). My research in this laboratory was to develop an understanding of the regulatory process by which isopentenyl tRNA, a nonsteroidal product of the cholesterol biosynthetic pathway, modulates HMG-CoA reductase gene expression and cell growth. Initial studies have resulted in the production, purification and characterization of antibodies to isopentenyl adenosine which is the modified nucleoside found in isopentenyl tRNA. A solid phase radioimmune assay system was developed which has been demonstrated to be the most sensitive and specific assay method available in the published literature for detecting the presence of isopentenyl tRNA in eukaryotic cell cytoplasm. The utility of this assay technique has been demonstrated in collaborative studies with a lab at the Hershey Med. Ctr., Hershey, PA, where tRNA gene

products from cloned yeast tRNA genes were screened for the presence of isopentenyl tRNA.

GRADUATE RESEARCH ACTIVITIES

1976 to 1981: I conducted my graduate research in the lab of David Shapiro, Ph.D., Assoc. Prof. of Biochem., U of IL (Urbana, IL) Sch. of Chem. Sci. The major theme of my research was to characterize the molecular mechanism(s) controlling cholesterol biosynthesis in human and rat liver cells, in vitro. HMG-CoA reductase, the key regulatory enzyme in the cholesterol biosynthetic pathway, was purified from rat liver and used to produce monoclonal antibodies by spleen cell-myeloma fusion methods. The resulting hybridomas were screened for anti-reductase antibody production using a solid phase radioimmune assay technique which I developed specifically for this system. The monoclonal antibodies proved extremely valuable for measurements of the rate of reductase synthesis and degradation, for the assay of HMG-CoA reductase mRNA by in vitro translation, and in the purification of HMG-CoA reductase from gene amplification mutant cells that overproduce HMG-CoA reductase.

UNDERGRADUATE RESEARCH ACTIVITIES

1973 to 1976: Completed 7 independent study courses under the direction of Charles Olander, Ph.D., Dept. of Biology (Austin College). Our research investigated the in vitro regulation of heme biosynthesis following erythropoietin stimulation of rat bone marrow cells.

Summer 1974: Participated in a 3-month research project funded by the National Science Foundation. The study was titled "Investigation into the Actions of Compounds that Function as Post-Irradiation Chemotherapeutic Agents."

January 1975: Conducted an independent research project in the lab of Dr. Eugene Goldwasser, Prof. of Biochem., Univ. of Chicago. The study included in vitro stimulation of heme and protein synthesis by erythropoietin and examination of the effect of high levels of ³H-thymidine on protein and mRNA synthesis in rat bone marrow cells.

Summer/Fall 1975: Worked in the laboratory of Robert Dowben, M.D., Ph.D., University of Texas Southwestern Medical School. My research explored the differences in amino acid and carbohydrate transport systems in lymphocytes isolated from trisomic and normal children.

1975 to 1976: Completed research for the Honors Program in Biology at Austin College with studies on the effects of cyclic adenosine 3':5'-monophosphate on rat bone marrow erythropoiesis, in vitro.

CURRENT RESEARCH PROJECTS

1. January, 1992: Evaluation of Cyanoacrylate sealants in wound healing.
2. 1993: Laser-Tissue Interaction Using the Free-Electron Laser.
3. 1993: Use of Immunohistochemical Markers to Facilitate Surgical Removal of Cutaneous Malignancies.

4. October, 1995: Laser Treatment of Actinic Cheilitis: Ultrapulse CO₂ vs Continuous Wave CO₂.
